Many to one Relationship

A Many to One relation is the same as one-to-many, but from a different viewpoint.
Consider a user using different ott platforms, here many subscriptions can be of one and the same user. Also, if we consider any one ott platform, there are multiple users using one website. Hence many to one relationship exists between user and subscriptions.

User Table

User_Id	User_Name
1	Zulfa
2	Ram
3	Adi
4	Zaid

Subscription table

Subs_id	Date	Amount	User_Id	Duration_In_Months
122	22-11-2021	500	4	6
123	15-7-2021	800	2	3
124	12-7-2021	200	3	6

In the above table, many to one relationship is shown between user and subscriptions.

Here, Many users using the same platform is shown. The primary key of user table is used as a foriegn key in Subscription table
